

Utopia.Data.DataManager.
Awake

Utopia.GameLogic.GameData
Manager.Awake

Utopia.TimeSystem.TimeManager.
Awake

Utopia.Core.Services.Hierarchical
ServiceLocator.Register

```
graph LR; A[Utopia.Data.DataManager.Awake] --> D[Utopia.Core.Services.HierarchicalServiceLocator.Register]; B[Utopia.GameLogic.GameDataManager.Awake] --> D; C[Utopia.TimeSystem.TimeManager.Awake] --> D;
```

The diagram illustrates a dependency or initialization flow. On the left, three white rectangular boxes are stacked vertically. Each box contains a fully qualified class name followed by the method name 'Awake'. Blue arrows originate from the right side of each of these three boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'Utopia.Core.Services.HierarchicalServiceLocator.Register', which represents a static method or a service registration point. The arrows indicate that the 'Awake' methods of the three classes on the left are responsible for registering themselves or their dependencies with the service locator.
